Internship

Data Analytics Job Simulation | Python, Excel, Pandas, Data Analysis

Mar 2026 - Apr 2026

Deloitte - Forage Virtual Internship

- Performed Exploratory Data Analysis (EDA) and Data Cleaning to generate actionable insights
- Applied analytical thinking to solve business problems, improving decision-making accuracy.
- Explored forensic technology concepts such as data validation and anomaly detection.

Software Engineer Job Simulation | Java, REST API, DBMS

Feb 2026 - Apr 2026

JP Morgan Chase & Co. - Forage Virtual Internship.

- Configured the project environment and built the backend application architecture.
- Utilized Apache Kafka for real-time data streaming and event processing
- Used H2 database for data storage, query execution, and backend testing.
- Developed and tested RESTful APIs for application functionality

Projects

Archify AI – AI-Driven Floor Plan to 3D Visualization Platform| React, TypeScript, Java 17

Jan 2026 - Jul 2026

- Architected an AI-powered platform that transform 2D floor plans into realistic 3D visualization, reducing manual rendering Time by 80%.
- Implemented Gemini AI to generate high-quality architectural renders in minutes, accelerating early-stage design visualize.
- Built a full-stack application using React, Spring Boot, and MongoDB to manage 100+ architectural projects with secure authentication and CRUD operation.

AI Driven Agriculture Market Place | Python, Flask, Pandas, HTML, MySQL, JavaScript, CSS

Jan 2026 - Present

- Integrate historical and simulated market data to generate intelligent pricing and demand insights.
- Created a farmer-friendly interface enabling crop listing, search, and market place transactions.
- Automated market analysis and demand forecasting, helping farmers make a faster and more informed selling decisions By up to 50%

Flexi Car – Car Rental Website | MERN Stack, Tailwind CSS, Vercel

Nov 2025 - Jan 2026

- Developed a full-stack, responsive car rental web application to streamline vehicle booking and rental management.
- Optimized application deployment on vercel for scalable and reliable hosting, and architect a modular MERN-based.
- Managed application state effectively using React Context API and useState for smooth user experience.

Certificates

Hackathon TECH-BLITZ

Jul 2025

Unstop

Data Science

Apr 2026

IBM (cognitive)

Machine Learning With Python

May 2025

IBM(cognitive)

Skills

Languages: Python, Java, C++, HTML.

Tools & Platforms: GitHub, Jupyter Notebook, VSCode, Vercel, Git.

Data Science: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, NumPy, Pandas, scikit-learn.

Database: MySQL, MongoDB (NoSQL), H2 Database, SQL, Database Design, Query Optimization (Basic).

Domain Skills: Data Structures and Algorithms, Analytical Skills.

Soft Skills: Communication, Leadership, Problem Solving, Critical Thinking, Analytical Thinking.

Education

Lovely Professional University

2025 - Present

Master Of Computer Applications - CGPA:7.89

Phagwara, Punjab

Shri Bajrang Singh Mahavidyalaya Mau Gauriganj

2021 - 2024

Bachelor's Of Science (Mathematics) - CGPA: 8.1

Amethi, Uttar Pradesh

Janta Shikshsan Sansthan Inter College Jamon Amethi

2019 - 2020

12th — Percentage: 63%

Amethi, Uttar Pradesh
